## Product Description

### Advantages:

1. High transparency, LED crystal film screen has high permeability, and the base material is high temperature resistant PET film. When the screen stops working, the screen is almost invisible and completely integrated into the glass;
2. Ultra-light and thin, only 3mm thick, and as light as 3.5kg/m<sup>2</sup>;
3. Bendable, LED crystal film screen has strong flexibility and can be attached to curved glass buildings;
4. Can be cut, support arbitrary cutting, not limited by size and shape, meet different size requirements, and realize more creative display;
5. Wide viewing angle, 140° at each angle, no dead angle and no color cast, every side is wonderful;
6. Safe and beautiful, the screen has no components, the power supply is hidden, safe and reliable;
7. Quick installation, simple and fast, can be directly attached to the glass surface.
